16.5 tires bfg

Our publishers independently research, test and recommend the best products; you can learn more about our review process [here](#). We may receive commissions for purchases made from our chosen links. Tires are the unknown heroes of the automotive world. Depending on the type, a good tire will give you a good grip on complicated surfaces and in adverse weather conditions. Unfortunately, it can be difficult to choose the right tires for your vehicle. Some are general, of all seasons or off-road, while others are designed specifically for certain driving conditions. How do you know which one to choose? It all comes down to the conditions and terrain you're most likely driving on. Where you live can be an important part of that. Do you have a constant bad weather? You want to get your vehicle off the road? Or do you just have a normal, normal commute? Here are the best tire options that vary in use so you can find the right one for your typical driving situation. The best tire is definitely one that provides as much grip and control in as many conditions as possible. Unfortunately, all seasonal or off-road tires are not necessarily the best choice. Finding the right tire with the best tread pattern is an act of balance between grip and performance. In other words, the best tire is one that manages to find the right combination of efficiency and traction for daily driving. The Antares Ingens A1 is a season-wide tyre with treads designed to grip road surfaces in many weather conditions. Specifically, the tread uses an alternate design with a striped pattern that grips on hard surfaces even when wet. For rain and light snow, there are open grooves between the treads to allow water and moisture to channel through the tire surface without damaging traction and overall performance. This tire fits any car, truck or SUV with wheels up to 18 inches depending on the size you buy. Budget tires can be a risky purchase, as poor tread compounds and poor designs can decrease traction and performance. Many budget options also have a shorter lifespan, which means you'll spend more long-term on replacements. However, when designed correctly, an inexpensive tire like the Douglas All-Season is the perfect choice for anyone who is financially limited to buying better, more expensive options. Douglas All-Season tires keep the price low with a simple yet effective commercial design. A pattern of Angles and straight channels

wrap around the tire surface to provide excellent grip on all seasons. Central channels channel water or snow so friction is not lost between the tire and the road surface. These channels also help prevent snow from accumulating and clinging to the tire while driving in winter conditions. This tire fits the standard 15-inch wheels found in common family cars. A season-wide tire is designed to limit or eliminate the need to replace your tires each season. From different times of will bring different weather and road conditions, these tires need to provide better traction and water detachment capabilities for times when roads become ugly. Water and snow in particular can interfere with a tire's grip on the road, as there is less friction involved. The Sumic GT-A uses a unique radial tire pattern to achieve stellar performance throughout the season on the roads. The central channels divide the width of the tire to allow snow and water to flow and fall from the surface and wet or snowy conditions. The four-rib symmetrical pattern provides curved, angled tread blocks to grip the road surface even at high speeds. Combined, the tread design offers sufficient traction control in normal driving situations, while reducing the spaces to which water and snow can cling at high speeds. The tire surface also uses an advanced, gripping compound to throw water that can remain around tread nooks and crannies. Many vehicles are able to drive in a variety of road and off-road conditions. Cars, trucks and SUVs equipped with more powerful engines and four-wheel drive trains will need the right set of tires to match. Because specific off-road tires require changes to maximize daily performance, an off-road tire may be a better choice if you plan to get your vehicle off the beaten track. These tires often use larger tread patterns with deeper grooves to dig deep into loose, challenging terrain. For driving conditions, the Goodyear Wrangler's tread design uses higher blocks and wider spaces to provide a lot of grip and control. Because off-road surfaces may vary, the tread pattern balances the width of channels to maximize traction in loose gravel and sand. The space also provides a natural flow route for water and snow in case you encounter bad weather, snow-covered terrain, or natural water sources while off the road. Designed for high speeds of up to 112 miles per hour and heavy loads of up to 2,000 pounds, this is a good tire for heavier heavy vehicles weighing by meat suspension, sliding plates and other parts you may need for challenging road conditions. The winter season offers a unique challenge for most vehicles. It's the only time typical roads and roads can literally disappear under a blanket of snow. Standard tyres with treads susceptible to snow accumulation and loss of traction. This inevitably means lower performance and the risk of an accident during the commute. Winter-specific tires, on the other hand, use tread trading patterns in wider grooves to prevent snow build-up while digging in loose layers. As winter tires need to dig deeper into the snow for traction, the Cooper Weather-Master uses an advanced snow groove design to penetrate loose snow as it rolls the wheel. Each tread block has an irregular profile that allows sharp surfaces to be attached to the snow as well. The spacing between the blocks is wide enough to shed snow, preventing it from compacting and accumulating to the point lose grip and control. With a consistent tread pattern around the vehicle, you can use this tire knowing that the surface will maintain traction throughout the wheel revolution. A real off-road tyre is destined for the outdoors. While its performance on the road will be less than satisfactory compared to a normal daily tire option, larger tread blocks and wider grooves will play well with loose rocks, sand, mud, snow and other terrain you're likely to find off the road. Many off-road tires also use special compounds to maximize grip or increase puncture resistance, so you're less likely to find a floor while in the middle of nowhere. The Hankook DynaPro ATM RF10 is on specific off-road tires with an enveloping tread pattern that maximizes grip in loose conditions. Achieve maximum grip and control with a tread design that is angular and uneven to prevent loose debris such as sand, rocks or mud from clinging to the surface as the vehicle rolls along. In addition to the tread pattern, the tire uses a heavy-duty compound that increases puncture resistance and extends tread surface life. This tire can be used in cars with larger wheels or typical trucks and SUVs intended for off-road use. To maximize traction, it's smart to use these tires in a four-wheel drive vehicle. Some people like the feeling of a road trip. Whether you're driving to the next city or crossing state lines, driving for long periods of time can almost be meditative. Tires that excel in these conditions, known as passenger tires, increase efficiency and performance by reducing rolling resistance. In other words, these tires make it easier for the wheels to roll so that the engine and transmission don't have to work so hard to keep the vehicle at a constant speed. The Westlake RP18 Touring does a perfect job of mixing a grip surface with low-strength tread blocks to maximize speed and efficiency during a long journey. The angular and alternate pattern of treads keeps tires clinging to normal road surfaces such as roads and roads. Meanwhile, straight tread strips decrease strength by providing a straight surface for the wheel to overturn at high speed. Meaning for 16-inch tires, this tire is a good choice for small to medium size common cars if you want to maximize fuel efficiency and during a road trip. Dark circles? Swollen eyes? Lack of sleep is not a joke when it comes to keeping your skin in peak condition, but if you're showing signs of a few nights too late, don't be afraid, we're here to help. From dull to bright tired eyes, we have the tricks you need to make you look less tired as soon as possible. With eight quiet hours to go under the duvet, nothing will have you looking shiny and bushy-tailed faster than these quick skin and makeup tricks. Keep scrolling through Byrdie's guide to make it look like a less tired statistic. A swollen face, especially under the eyes (hello, bags), is a huge you've had less than a proper closed eye. But with a little help, this can be fixed quickly. According to Michael Roizen, MD, president of the Wellness Institute at the Cleveland Clinic, this temporary swelling is only fluid that, if you had rested properly, would have been distributed throughout the body. Without sleep, however, this excess fluid builds up under the eyes instead. For things to move again, you'll need to help your body's lymphatic drainage system: Enter DIY facial massages. While several techniques can help de-puff, the simplest is to use the ring fingers and, starting at the inner corners, slowly sweep your fingers along the skin into the siens, manually helping to disperse the liquid. Use very gentle pressure (the skin here is super delicate, remember) and a soothing oil like Trilogy Organic Rosehip Oil (\$29) or an eye serum that deflates like The Ordinary Caffeine Solution (see below), to help your fingers glide over the skin. Make-up artist Lisa Eldridge also suggests freezing green tea on a tray of ice cubes, then using the buckets to press along the bottom of the eye. You'll help cool, soothe and de-puff in one go, while caffeine in tea will help stimulate the skin and make things drain again. The ordinary caffeine solution 5% + EGCG \$7 Store If swollen eyes are not your number one gift, you're probably sporting some pretty attractive dark circles instead. As with swollen bags under the eyes, dark circles are also caused by a buildup of fluid. If you've been up all night looking at a laptop, rubbing your eyes more than usual, or pushing your body too late, blood can build up here as a result of slow drainage and slow circulation, hence discoloration. Your first port of call is a good eye cream. Scans the list of ingredients for caffeine that will increase circulation and constrict blood vessels in the area, retinoic acid that will temporarily thicken the skin to disguise discoloration, or arnica (used to treat bruising in herbal medicine), which will reduce swelling and inflammation. Jurlique Herbal Recovery Eye Cream \$56 Shop MUA Carissa Ferreri's Tricks for Brighter, Awake-Looking Eyes Ever not your lines are more prominent when you're tired? Or that your skin is a little less tight? This is because your body hasn't had the opportunity to adequately replenish its collagen reserves overnight (there's a lot to do during eight hours of beauty sleep, you know). The solution is plump on your skin with super moisturizing skin care: look for creams or serums that contain hyaluronic acid, or facial oils rich in vitamins A, C and E. Elemis Pro-Collagen Super Elixir \$78.50 Shop Looking for some sallow? According to Amit Sood, MD, an associate professor of medicine at Mayo Clinic, both lack of sleep and chronic stress can trigger a drop in the body's melanin production, meaning the skin may appear dull or washed. While proper rest is, of course, the best solution, a touch of primer that increases glare is a great temporary measure. Provisional. Beckham fights her facial fatigue with her Estée Lauder Morning Aura Illuminating Creme, while we also love mixing a creamy highlighter like Charlotte Tilbury Wonder Glow with our base and pouncing along the forehead bone and over the eyelids. Charlotte Tilbury Wonder Glow Instant Soft-Focus Beauty Flash \$41 Shop Nothing ends a tired face like a color. Look for a luminous blush that gives your cheeks a pink glow, and focus on mixing it through the apples on your cheeks and into the cheekbones to help give your face a little definition. Cream formulas are ideal for giving the skin a dew shine; we love the cream color RMS Beauty Lip2Cheek in Modest, a rich pink berry, which can be placed everywhere and built for a more intense tone. Finish with a mascara stain and a little concealer under your eyes and you're ready to go! RMS Beauty Lip2Cheek at Modest \$36 Shop If you need to spend the day in less than ideal sleep hours, coffee won't have the effect you expect. Caffeine is a temporary solution, dr. Stanley, a sleep expert, tells us. If you drink too much caffeine, it actually becomes a sedative, it will give you a boost, but then too much will have the reverse effect, he explains. Instead, stay hydrated with plenty of water (which will help sobb your skin too) and look for energizing infusions instead, such as mint, ginseng and liquorice blends. Neal's Yard Remedies Organic Refreshing Tea \$3 Shop Next up: Six easy ways to recover from a bad night's sleep. Sleep.
